PROFESSIONAL SUMMARY

Forward-deployable Solution Architect with a three-year focus in Palantir Foundry solutions and 15+ years of experience as a software/data engineer, with a strong computer science background. Combines hands-on engineering, systems thinking, and technical vision to deliver high quality, mission-focused solutions.

Highly experienced in distilling cross-functional requirements into clear technical direction and results-based outcomes. Brings a can-do, positive, and "lead-from-the-front" attitude to well-defined projects with clear requirements, and brings a helpful systems perspective to complex projects, identifying the dependencies, constraints, and decisions that shape delivery, enabling better stakeholder alignment and helping teams move forward with shared purpose and sound technical direction.

Skilled in building software architectural designs, vision setting, problem-solving, and troubleshooting, and highly proficient in code and design reviews, product ownership, and ensuring high-quality product delivery, in both greenfield efforts and when fine-tuning/refactoring legacy systems and codebases. Effective in remote, hybrid, and on-site environments, including working in secure government environments. Moves missions forward with integrity, win-wins, and clear thinking.

TECHNICAL QUALIFICATIONS

Platforms & Technologies: Palantir Foundry, AIP and Gotham; ETL/ELT pipelines; AI/ML-enabled workflows; Ontology and data modeling; automations. **Software & Data Engineering:** Python, Java, SQL, PySpark, TypeScript, Bash, C++, Git, testing, debugging, CI/CD. **Delivery:** Requirements analysis, product implementations, release management, cross-functional collaboration, solution architecture, stakeholder alignment, technical leadership, agile delivery, problem solving, data stewardship, code and design review.

WORK EXPERIENCE

Foundry Developer II | National Capitol Contracting | 8255 Greensboro Dr c100, McLean, VA 22102
07/2026–09/2026 | 40 hours/week | On-site position | **Supervisor**: Earl Smith, phone: 703-380-2240, may contact? Yes

- On-ramped and trained in strengthening the Navy's digital and operational capabilities via the Naval Digital Logistics Acceleration program, a congressionally funded data analytics initiative.
- Collaborated with senior Navy leadership and stakeholders; advised NAVSEA (Naval Sea Systems Command) on Palantir Foundry Workshop application dashboard improvements.

Palantir Data Engineer / Data Engineer 3 | Booz Allen Hamilton | 8283 Greensboro Drive, McLean, VA 22102
07/2025–06/2026 | 40 hours/week | Hybrid position | **Supervisor**: Chase Chapman, may contact? Yes
Served as a forward-deployed data engineer/data scientist translating operational and financial-management needs into secure, scalable Palantir Foundry capabilities, solutions, and documentation. Coordinated with government stakeholders, engineers, analysts, and platform specialists to align requirements, resolve implementation issues, and deliver auditable workflows and solutions.

- Worked directly with Palantir engineers to implement a financial management data-stewardship pilot solution within the Advana War Data Platform for a DoD client, integrating and reconciling financial data from more than 12 disparate source systems.
- Designed and built a variance resolution workflow that enabled research, collaboration, auditing, and approvals of potential matches for unmatched transaction record tickets, incorporating agentic AI-driven and data-driven reconciliation insights, utilizing Python data pipelines, PySpark DataFrame ETL transforms, Ontology Object, Link, and Action Types, AIP Logic integrations, Agentic AI, and Workshop modules.
- Established reusable Palantir Foundry best-practice documentation, workflows, applications, functions, and templates.
- Supported a Maven Smart System Bootcamp at Quantico, VA, and EUCOM efforts during temporary duty in Stuttgart, Germany.

Lead Implementation Engineer | Foxtrot Professional Services | 1640 Boro Place, Suite 500. McLean, Virginia 22102
03/2025–07/2025 | 40 hours/week | Remote position | **Supervisor**: Morgan Pietruszka, may contact? Yes

- Applied expertise in Palantir Foundry Ontology design, data pipelines, and model integrations to optimize an energy sector client's Foundry instance for current and future data modeling needs while maintaining best-in-class security and governance standards.
- Delivered a working Palantir Foundry minimum viable product (MVP) utilizing Pipeline Builder ETLs, Code Repository Typescript transforms and functions, build schedules, Automate functions, Ontology Object Type, Link, and Action Types, and Workshop modules, that enabled just-in-time and anticipatory oil & gas contractual lookups across large datasets, with customizable rule and filter settings, in accordance with Oil & Gas industry standards, best practices, and specified business logic.

Solutions Architect and Senior Engineer | PVM Inc. | 2305 Historic Decatur Rd Suite 100 San Diego, CA 92106
02/2024–11/2024, and **03/2023–11/2024**, respectively | 40 hours/week | Remote position
Supervisor: Heather Darby, phone: 540-408-3422, may contact? Yes

- As technical lead for a team serving a DoD counter-intelligence client, led and executed product deliveries across the full software development lifecycle (SDLC), including planning, analysis, design, development, testing, deployment, release management, and maintenance across multiple contract years; also mentored engineers and reviewed/improved on solution designs, code, and product delivery using best practices and agile methodologies while in this role.
- Implemented and supported a Wildfire Prevention & Resource Allocation Bootcamp at Palantir's Washington, D.C. office.

- Proactively envisioned, chartered, and demonstrated multiple reusable Palantir Foundry pipelines, working examples, and application solutions for company-wide use across projects and teams, via Ontology Object, Link, and Action Type implementations, Python and Typescript Code Repositories, Workshop modules, and Pipeline Builder transforms.
- Coached value-added career growth and knowledge distribution, and increased team & project development velocities, through proactive, consistent mentorship, inbound engineering vision and strategy, and positive leadership practices.
- Led technical writing, solution design, and strategic vision for multiple direct and partnered contract proposals; established aligned squad-level objective and key results (OKRs), key performance indicators (KPIs), and measurable engineering growth strategies.

Software Engineer III / Software Engineer II | PVM Inc. | 2305 Historic Decatur Rd Suite 100 San Diego, CA 92106
12/2018–03/2023 | 40 hours/week | Remote position | **Supervisor:** David Cowart, phone: 757-289-3299, may contact? Yes
Designed, built, tested, troubleshot, and maintained bespoke Palantir Gotham applications. Collaborated with customer analysts and Palantir teams; converted user needs into implementation plans, coordinated platform upgrades and migrations with Palantir engineers, and maintained rigorous quality standards through code reviews, pair programming, mentoring, and automated tests.

- Planned, estimated, and delivered Palantir Gotham technical solutions supported by a maintained quality-assurance test suite.
- Coordinated cross-team development across multiple technology-stack updates and platform-upgrade lifecycles.

Software Engineer | IST Research, LLC (Acquired by Two Six Technologies) | 401 Hanover St. Fredericksburg, VA 22401
02/2015–06/2018 | 40 hours/week | Remote position | **Supervisor:** Ryan Patterson, may contact? Yes
Developed RESTful APIs, Android applications, and software solutions using PHP, Java, and the Android SDK. Collaborated across engineering environments on requirements, programming, testing, debugging, securing, and delivery of customer-facing systems.

- Served in leadership role of agile Scrum Master and mentoring newly onboarded developers.

Contract Android Developer | Atomic Axis (Now Enola Labs) | 432 North Main Street, #200 Blacksburg, VA 24060
12/2013–05/2015 | 40 hours/week | On-site position | **Supervisor:** Bill Rascher, may contact? Yes
Built a variety of Java/Android SDK applications, including for the Texas DPS and a proof of concept (POC) for GREX Rail, integrating external APIs and data sources. Drove daily agile delivery, used source control best practices, and led in solution designs.

Co-Founder and Co-CEO | MoGo Mobile, Inc. (Product: FreshAiR) | Radford, Virginia
05/2011–11/2014 | 40 hours/week | On-site position | **Supervisor:** Self-employed, may contact? Yes

- Co-founded Radford University's first start-up spin-off company; included an IP patent submission and technology transfer.
- Managed all aspects of day-to-day company operations. including engineering, planning, sales, marketing, & personnel.
- Created FreshAiR, an award-winning SaaS platform, that included augmented reality apps on both iOS and Android.

Senior Programmer | Radford University GAMeS Lab | 801 East Main Street, Radford, Virginia 24142
05/2009–05/2011 | 10 hours/week | On-site position | **Supervisor:** Dr. Matt Dunleavy, may contact? Yes

- Designed award-winning educational iPhone application utilizing Objective C, iOS, & XCode.
- Led team through multiple development life-cycles of educational iPhone apps, garnering improvements and updated functionality.
- Wrote and presented augmented reality research paper, which was catalyst for initial design & development of FreshAiR, an award-winning SaaS platform.

Army Civilian Student Intern | DoD, PEO Enterprise ALTESS | Radford Arsenal, Constitution Rd, Radford, VA 24141
08/2008–05/2011 | 10 hours/week | On-site position | **Supervisor:** Chad Vance, may contact? Yes
Obtained security clearance, performed information technology and computer programming work, supervised team of contractors.

- Furthered development of two multi-million-dollar internal web applications for the DoD that aggregated and categorized government contract financial data utilizing PHP, Python, CSS, & HTML.
- Built web application for database querying of workstation information technology issues utilizing Oracle PL/SQL, CSS, & HTML.

EDUCATION

Bachelor of Science, Computer Science & Technology - Radford University, Radford, VA
Graduated 12/2010 | GPA: 2.93 (I simultaneously worked two jobs at the time!)

Associate of Applied Science, Information Technology - New River Community College, Dublin, VA
Graduated 05/2009 | Magna Cum Laude | GPA: 3.733

CERTIFICATIONS

Palantir Foundry Aware (08/2026); Palantir Foundry & AIP Builder Foundations (09/2024); Palantir Foundry Foundations (09/2023); Palantir Foundry Solution Architect Professional (06/2024 - 06/2026); Palantir Foundry Data Engineer Associate (01/2024 - 01/2026)
